

CLAIMS

- [001] A refrigerating unit for installing in a furniture niche of a kitchen unit or the like, comprising a body (6) and a door (10) that enclose a thermally insulated inside compartment (14), wherein the door (10) can pivot about an axis between an open and a closed position, characterised in that when the refrigerating unit is properly installed in the furniture niche, the door (10) projects over the front edge (3) of the furniture niche.
- [002] The refrigerating unit according to claim 1, characterised in that the body (6) of the refrigerating unit remains with its front side behind the front edge (3) of the furniture niche.
- [003] The refrigerating unit according to claim 1, characterised in that the body (6) of the refrigerating unit ends with its front side flush with the front edge (3) of the furniture niche.
- [004] The refrigerating unit according to any one of the preceding claims, characterised in that the inside compartment (14) projects over the front edge (3) of the furniture niche.
- [005] The refrigerating unit according to claim 4, characterised in that the portion of the inside compartment (14) which projects over the front edge (3) of the furniture niche is formed by a receiving area in the door (10).
- [006] The refrigerating unit according to claim 5, characterised in that the receiving area is formed by a corresponding recess on the inner side of the door (10).
- [007] The refrigerating unit according to claim 6, characterised in that the recess on the inner side of the door (10) is formed by a cavity-like recess which extends at least substantially over the height and width of the inner side of the door (10).

- [008] The refrigerating unit according to any one of claims 1 to 7, characterised in that on its outer side facing away from the inside compartment the door (10) has a decorative end state which ends flush with the front of neighbouring furniture of the kitchen unit.
- [009] The refrigerating unit according to claim 8, characterised in that the outer side is formed by a stainless steel outer wall.
- [010] The refrigerating unit according to any one of the preceding claims, characterised in that the door (10) comprises a door panel formed from the door outer cladding (12) of a heat insulating layer and a door inner cladding and spars (13) projecting from the door panel to the body (6) and that a pivot axis of the door (10) runs through the door panel (12).
- [011] The refrigerating unit according to any one of the preceding claims comprising a decorative panel (15, 18) which covers the door (10) and can move therewith, characterised in that the decorative panel (15, 18) is rigidly mounted on the door (10).
- [012] The refrigerating unit according to any one of the preceding claims, characterised in that a piece (19, 20) of the decorative panel (18) covers a side flank of the door (10).
- [013] A set of parts for mounting a refrigerating unit according to any one of the preceding claims, comprising a body (6) and a plurality of doors (10) of different depth which can be mounted on the body (6).
